

QA TRAINING PROJECT

INVENTORY MANAGEMENT SYSTEM – IMS

**WHO AM I, AND HOW DID I APPROACH
THIS PROJECT?**

- ▶ Nathan Evans
- ▶ From a bootcamp mainly focused on Frontend programming
- ▶ Coming into this project:
 - ▶ Start simple
 - ▶ Manage the project in depth
 - ▶ Learn new techniques and skills

**WHAT TECHNOLOGIES HAVE YOU
LEARNED FROM THIS PROJECT?**

- ▶ **Jira:** Project Management, Bug Tracking, Sprint coordination, Documentation
- ▶ **LucidChart:** ERD, UML, and diagram creation/editing
- ▶ **Git:** GitHub, Branching, Version control, and Conflicts
- ▶ **MySQL:** Relational DB, M2M join tables, and Query syntax
- ▶ **Java:** MVC Structuring, Class/Methods
- ▶ **Maven/JUnit:** Compiler and Unit Testing

HOW DID I APPROACH VERSION CONTROL?

▶ **GitHub:**

- ▶ Each new area of work got a new branch eg.
 - ▶ Master -> dev -> feature -> customer -> customer-update
- ▶ Still had some merge conflicts from improper push/pull requests.

GitHub branch conflicts

LETS DO A TEST RUN

**WHAT GOT COMPLETED AND
WHAT WAS LEFT BEHIND.**
